

Forgen transforms its safety culture with Safety Mojo.

In 2021, Forgen digitized their safety program with Safety Mojo, confident that the platform's ease of use could foster widespread engagement. In the first year, Forgen has seen a 82% voluntary participation rate, and the leading indicator data provided by Safety Mojo is helping them make better safety decisions and transform their safety culture.

At a glance:

Forgen

located in six regional offices across the U.S.

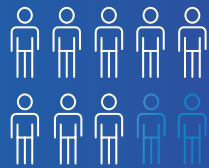

Services

Integrated environmental, geotechnical, and civil construction services

300+

Employees

Results:

82%

engagement in year one

Access to critical data

Improved data-driven decision making

Better understanding of risk

Timely incident notifications

Objectives

- Adopt a digital tool that is intuitive and user friendly to promote engagement
- Get the leading indicator data needed to make smart decisions
- Choose a safety program that can be tailored to Forgen's specific needs

Solution

- Take advantage of Safety Mojo's ease of use to promote broad adoption and engagement
- Use Safety Mojo leading indicator dashboards to identify areas of improvement
- Utilize Safety Mojo's messaging capability to improve incident-related communications

Results

- 82% voluntary engagement in year one and rapidly increasing
- Better insights into observations, inspections, and incident reporting data
- Improved safety communications across projects
- Acquired ability to track employee safety training

“The user friendliness of Safety Mojo's interface is unparalleled. I can sum up its main benefit in one word: engagement.”

– Palmer Behles, CSP
Safety, Health, & Environmental Director
